God's Eye

INSTRUCTIONS

Step 1: Hold two craft sticks together and start out your craft with your first color. Holding the sticks can be tricky so for kids I recommend gluing the sticks together. You can just use regular craft glue for this.

Step 2: Wrap the yarn around one side diagonally approximately 5-6 times. Looping over the initial start so it will stay tight.

Step 3: Loop under the craft stick so that you can go in the opposite direction.

Step 4: Going the opposite direction, wrap the yarn around the other side 5-6 times. You should have a X at this point.

Step 5: Next, wrap the yarn under the craft stick again.

Step 6: Bring across the top diagonally. You should be going in the direction you started off the craft with.

Step 7: Wrap under the craft stick and across diagonally (the opposite direction) again.

Step 8: Continue to wrap the yarn over each side and across diagonally until you reach your desired number of rows.

Step 9: To change colors tie the two pieces of yarn together. Cut off any excess so you can easily hide the knot.

Step 10: Continue wrapping the same as before. To change colors again just use the same tie off method.

Step 11 & 12: Once you have reached your desired color combo and length tie it off leaving extra yarn to create a hanger.

Step 13 & 14: Tie off the back in a knot so that you can hang your craft. I also recommend adding a dot of hot glue to secure the yarn and hanger.
